

# REMEDIAL SITE ASSESSMENT DECISION - EPA REGION II

Page 1 of 1

EPA ID: NYD980762785 Site Name: GIBSON OIL & CHEMICAL

Alias Site Names: GIBSON CHEMICAL (THERM-X)

City: COMMACK

County or Parish: SUFFOLK

State ID: 152023

State: NY

Refer to Report Dated: 02/25/1995

Report Type: SITE REASSESSMENT 001

Report Developed by: DEC

## DECISION:

☒ 1. Further Remedial Site Assessment under CERCLA (Superfund) is not required because:

☒ 1a. Site does not qualify for further remedial site assessment under CERCLA (No Further Remedial Action Planned - NFRAP)

☐ 1b. Site may qualify for action, but is deferred to:

☐ 2. Further Assessment Needed Under CERCLA:

2a. Priority: ☐ Higher ☐ Lower

2b. Other: (recommended action) NFRAP (No Further Remedial Action Planned)

## DISCUSSION/RATIONALE:

The U.S. Environmental Protection Agency (EPA) has determined that no further remedial action by the Federal Superfund program is warranted at the referenced site, at this time. The basis for the no further remedial action planned (NFRAP) determination is provided in the attached document. A NFRAP designation means that no additional remedial steps under the Federal Superfund program will be taken at the site unless new information warranting further Superfund consideration or conditions not previously known to EPA regarding the site are disclosed. In accordance with EPA's decision regarding the tracking of NFRAP sites, the referenced site may be removed from the CERCLIS database and placed in a separate archival database as a historical record if no further Superfund interest is warranted. Archived sites may be returned to the CERCLIS site inventory if new information necessitating further Superfund consideration is discovered.

The site is a warehouse and production facility located in an industrial park. The facility repackage bulk supplies of automotive fluids such as anti-freeze, brake fluids and etc. In April and July 1994, two sets of groundwater samples were taken from the on-site monitoring wells, in response to the Article 78 petition filed by the owner. Analytical data indicated no continuing source of groundwater contamination by hazardous waste (spent solvents) previously found in groundwater samples taken during the site investigation.

In February 1995, as part of the Article 78 settlement, the site was delisted by the New York State Department of Environmental Conservation (NYSDEC) and continues to be monitored by the NYSDEC Region 1 Oil Spill staff.
